STAR GAZING - On Wednesday evening Mrs. Gatti's class visited the home of Mr. & Mrs. Milo Wadlin (Milo Wadlin - 5th grade) in Princeton Junction. Mr. Wadlin's hobby is building telescopes and studying the heavens. Through Mr. Wadlin's electric telescope the boys were able to see Jupiter and four of its moons, Saturn and one of its three rings, and many other interesting objects. Mrs. Gatti's class has used this interest in a unit study in science. Each boy is contributing to the class project.

ANGELS AND THE SHEPHERDS - The most talked about music in the home choir is the new "Angels and the Shepherds." The choir has made extremely good headway in this piece. We have still to work hard for a goal that is worth achieving. So with our fingers crossed we are plunging headfirst into music and more music like "The Angels and the Shepherds".

My opinion is that this year the home choir will put on some of the best concerts.
